

The AI Knowledge Manager: Immediate Access to Your Institutional Brain

Transform fragmented data into a unified, high-value asset with the Knowledge Manager Agent. Move beyond static databases to a fully orchestrated "Institutional Brain" that ingests, analyzes, and activates your data across every department—from complex video training to legacy documentation—with human-in-the-loop oversight at key knowledge activation points.

The Orchestrated Ecosystem: Specialized Support Agents

We deploy an interconnected suite of specialized agents that work together to activate and operationalize your institutional memory:

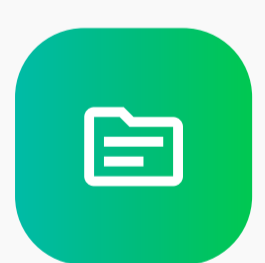

CATEGORY I

Data Ingestion & Synthesis

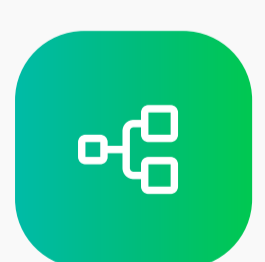

Universal Ingestion Agent

Effortlessly ingests text, files, video, and URLs to build a unified knowledge base.

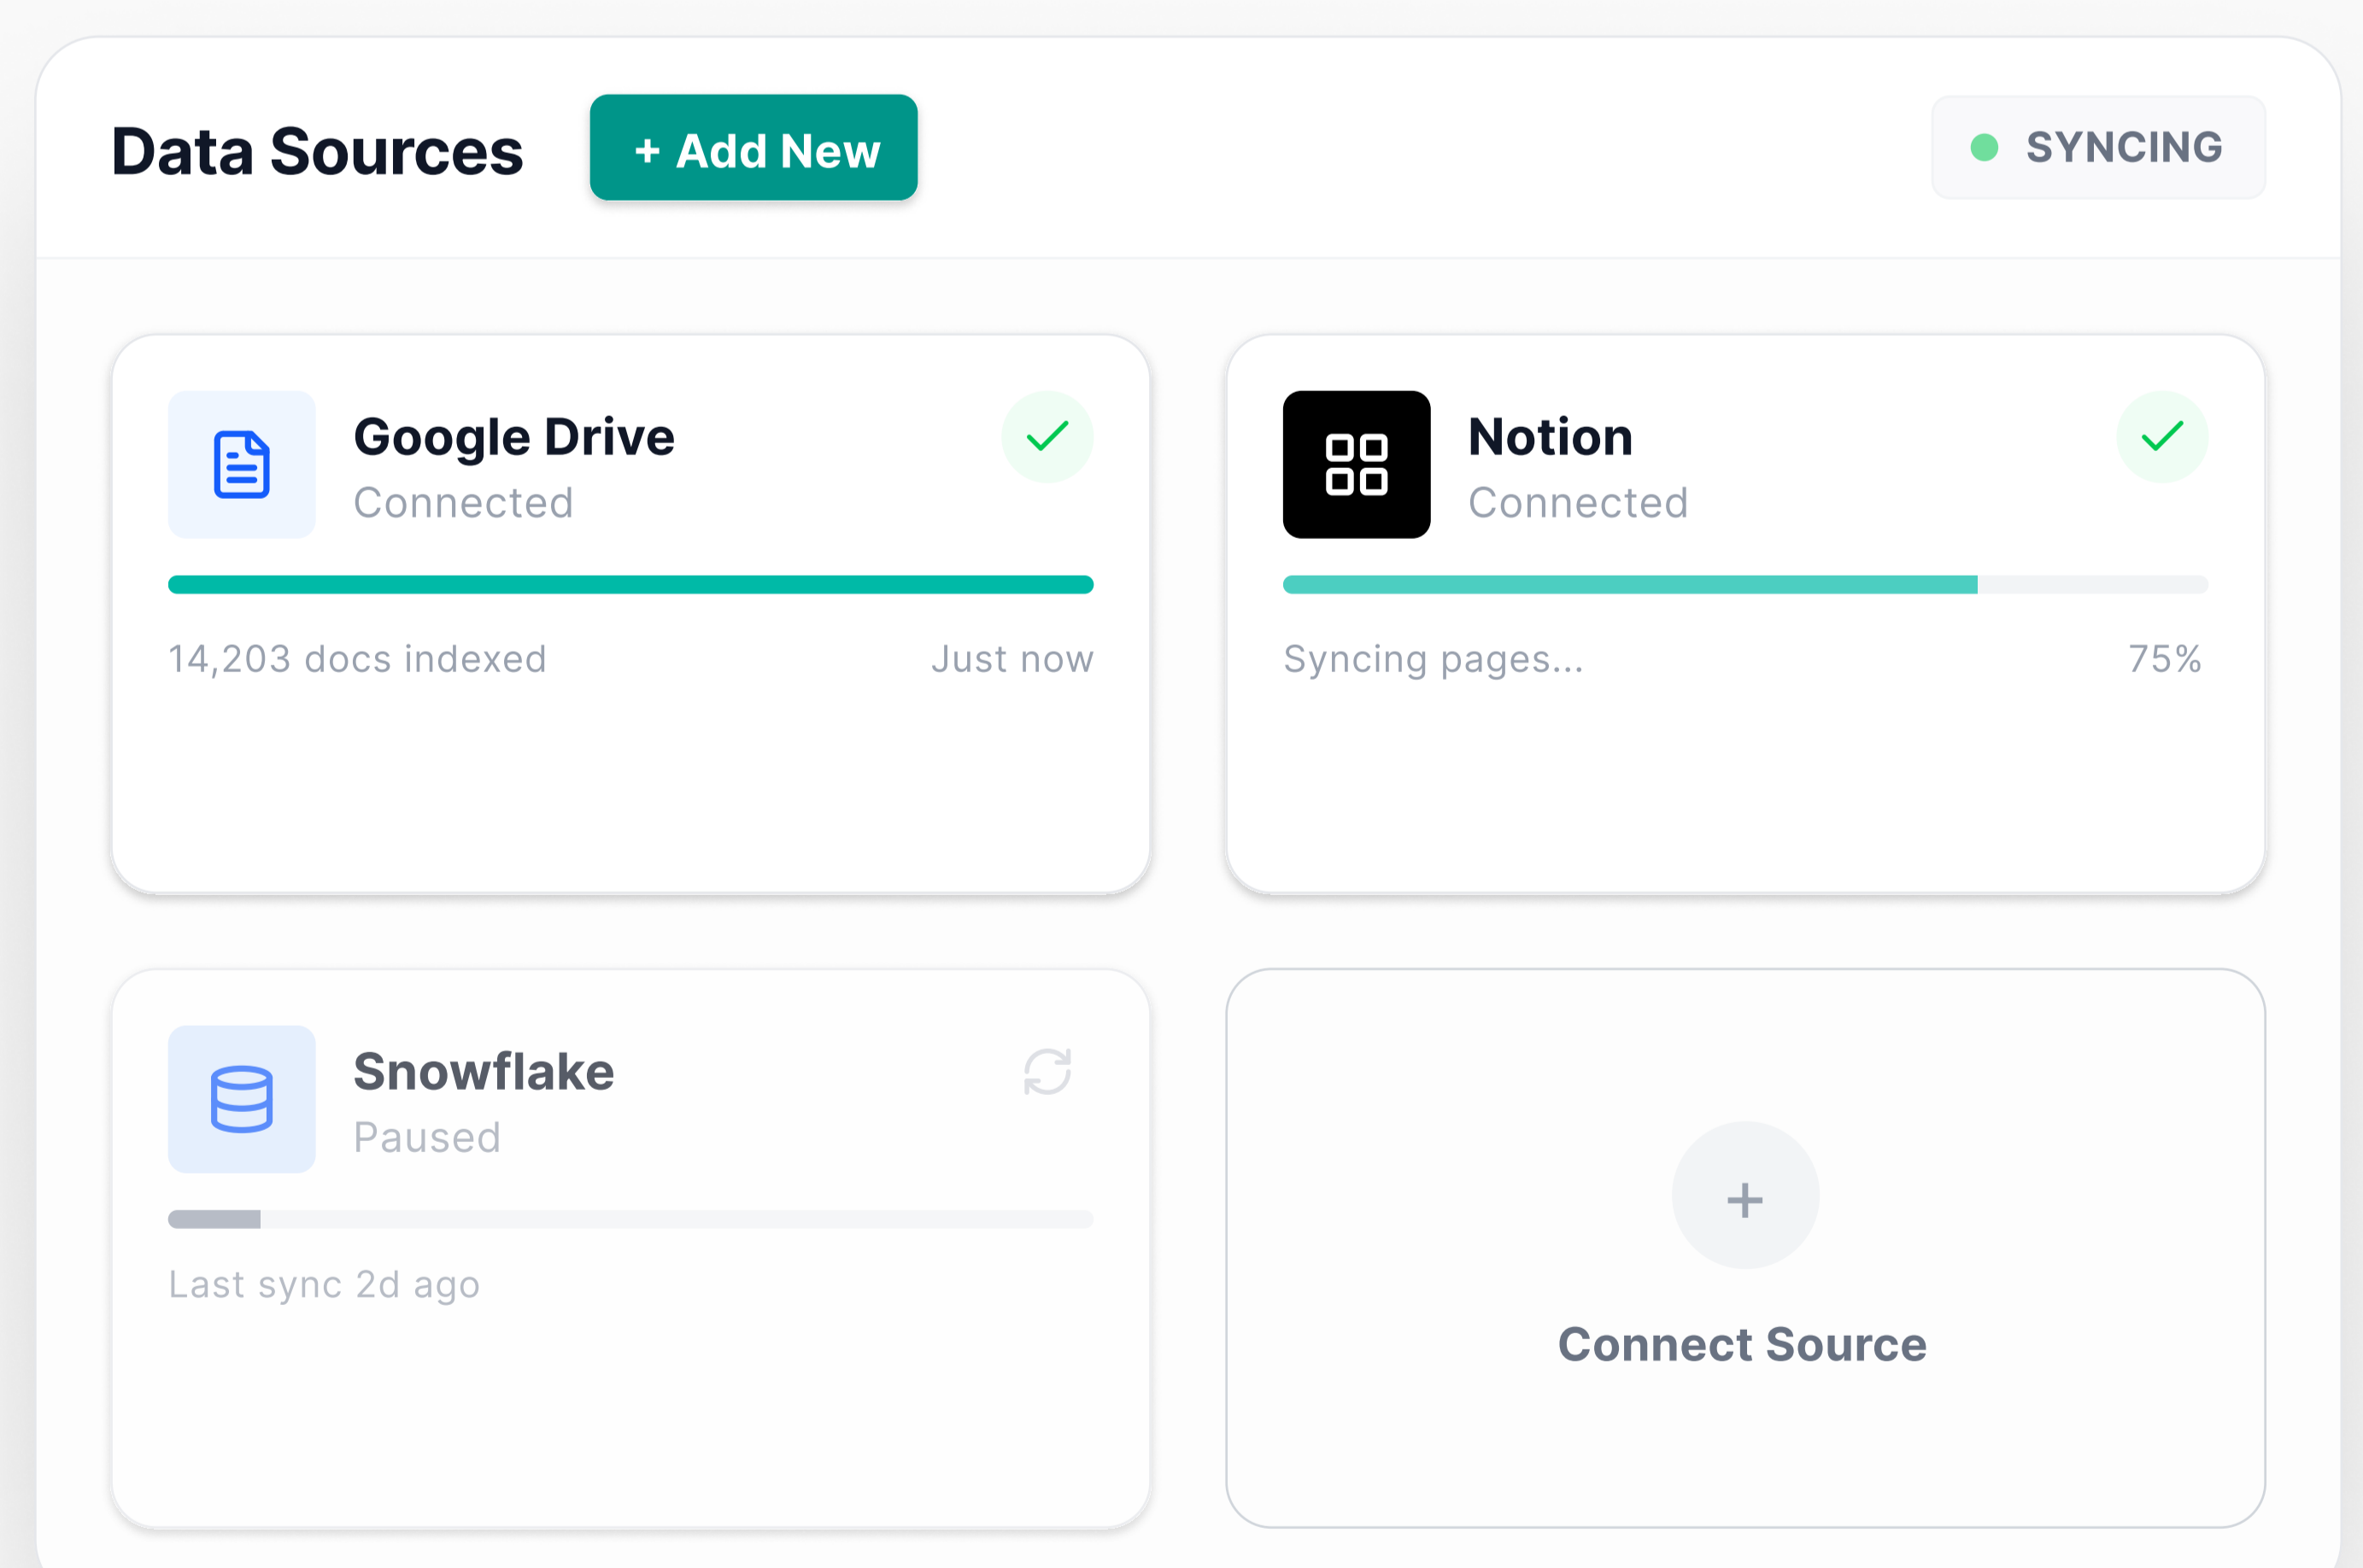

Silo Elimination Agent

Bridges fragmented data sources across disparate departments to create a consolidated and governed knowledge source.

Metadata Architect

Automatically structures and tags raw information to ensure consistent searchability and contextual relevance.

CATEGORY II

High-Velocity Intake & Scheduling

RAG Orchestrator

Leverages proprietary RAG architecture to provide sub-second, context-aware answers grounded in your approved internal data sources.

Institutional Memory Analyst

Provides deep-dive insights and complex data analysis based on your organization's unique historical records.

Trend Detection Agent

Monitors internal data shifts to identify emerging operational patterns and decision-making opportunities.

CATEGORY III

Security & Governance

RBAC Security Agent

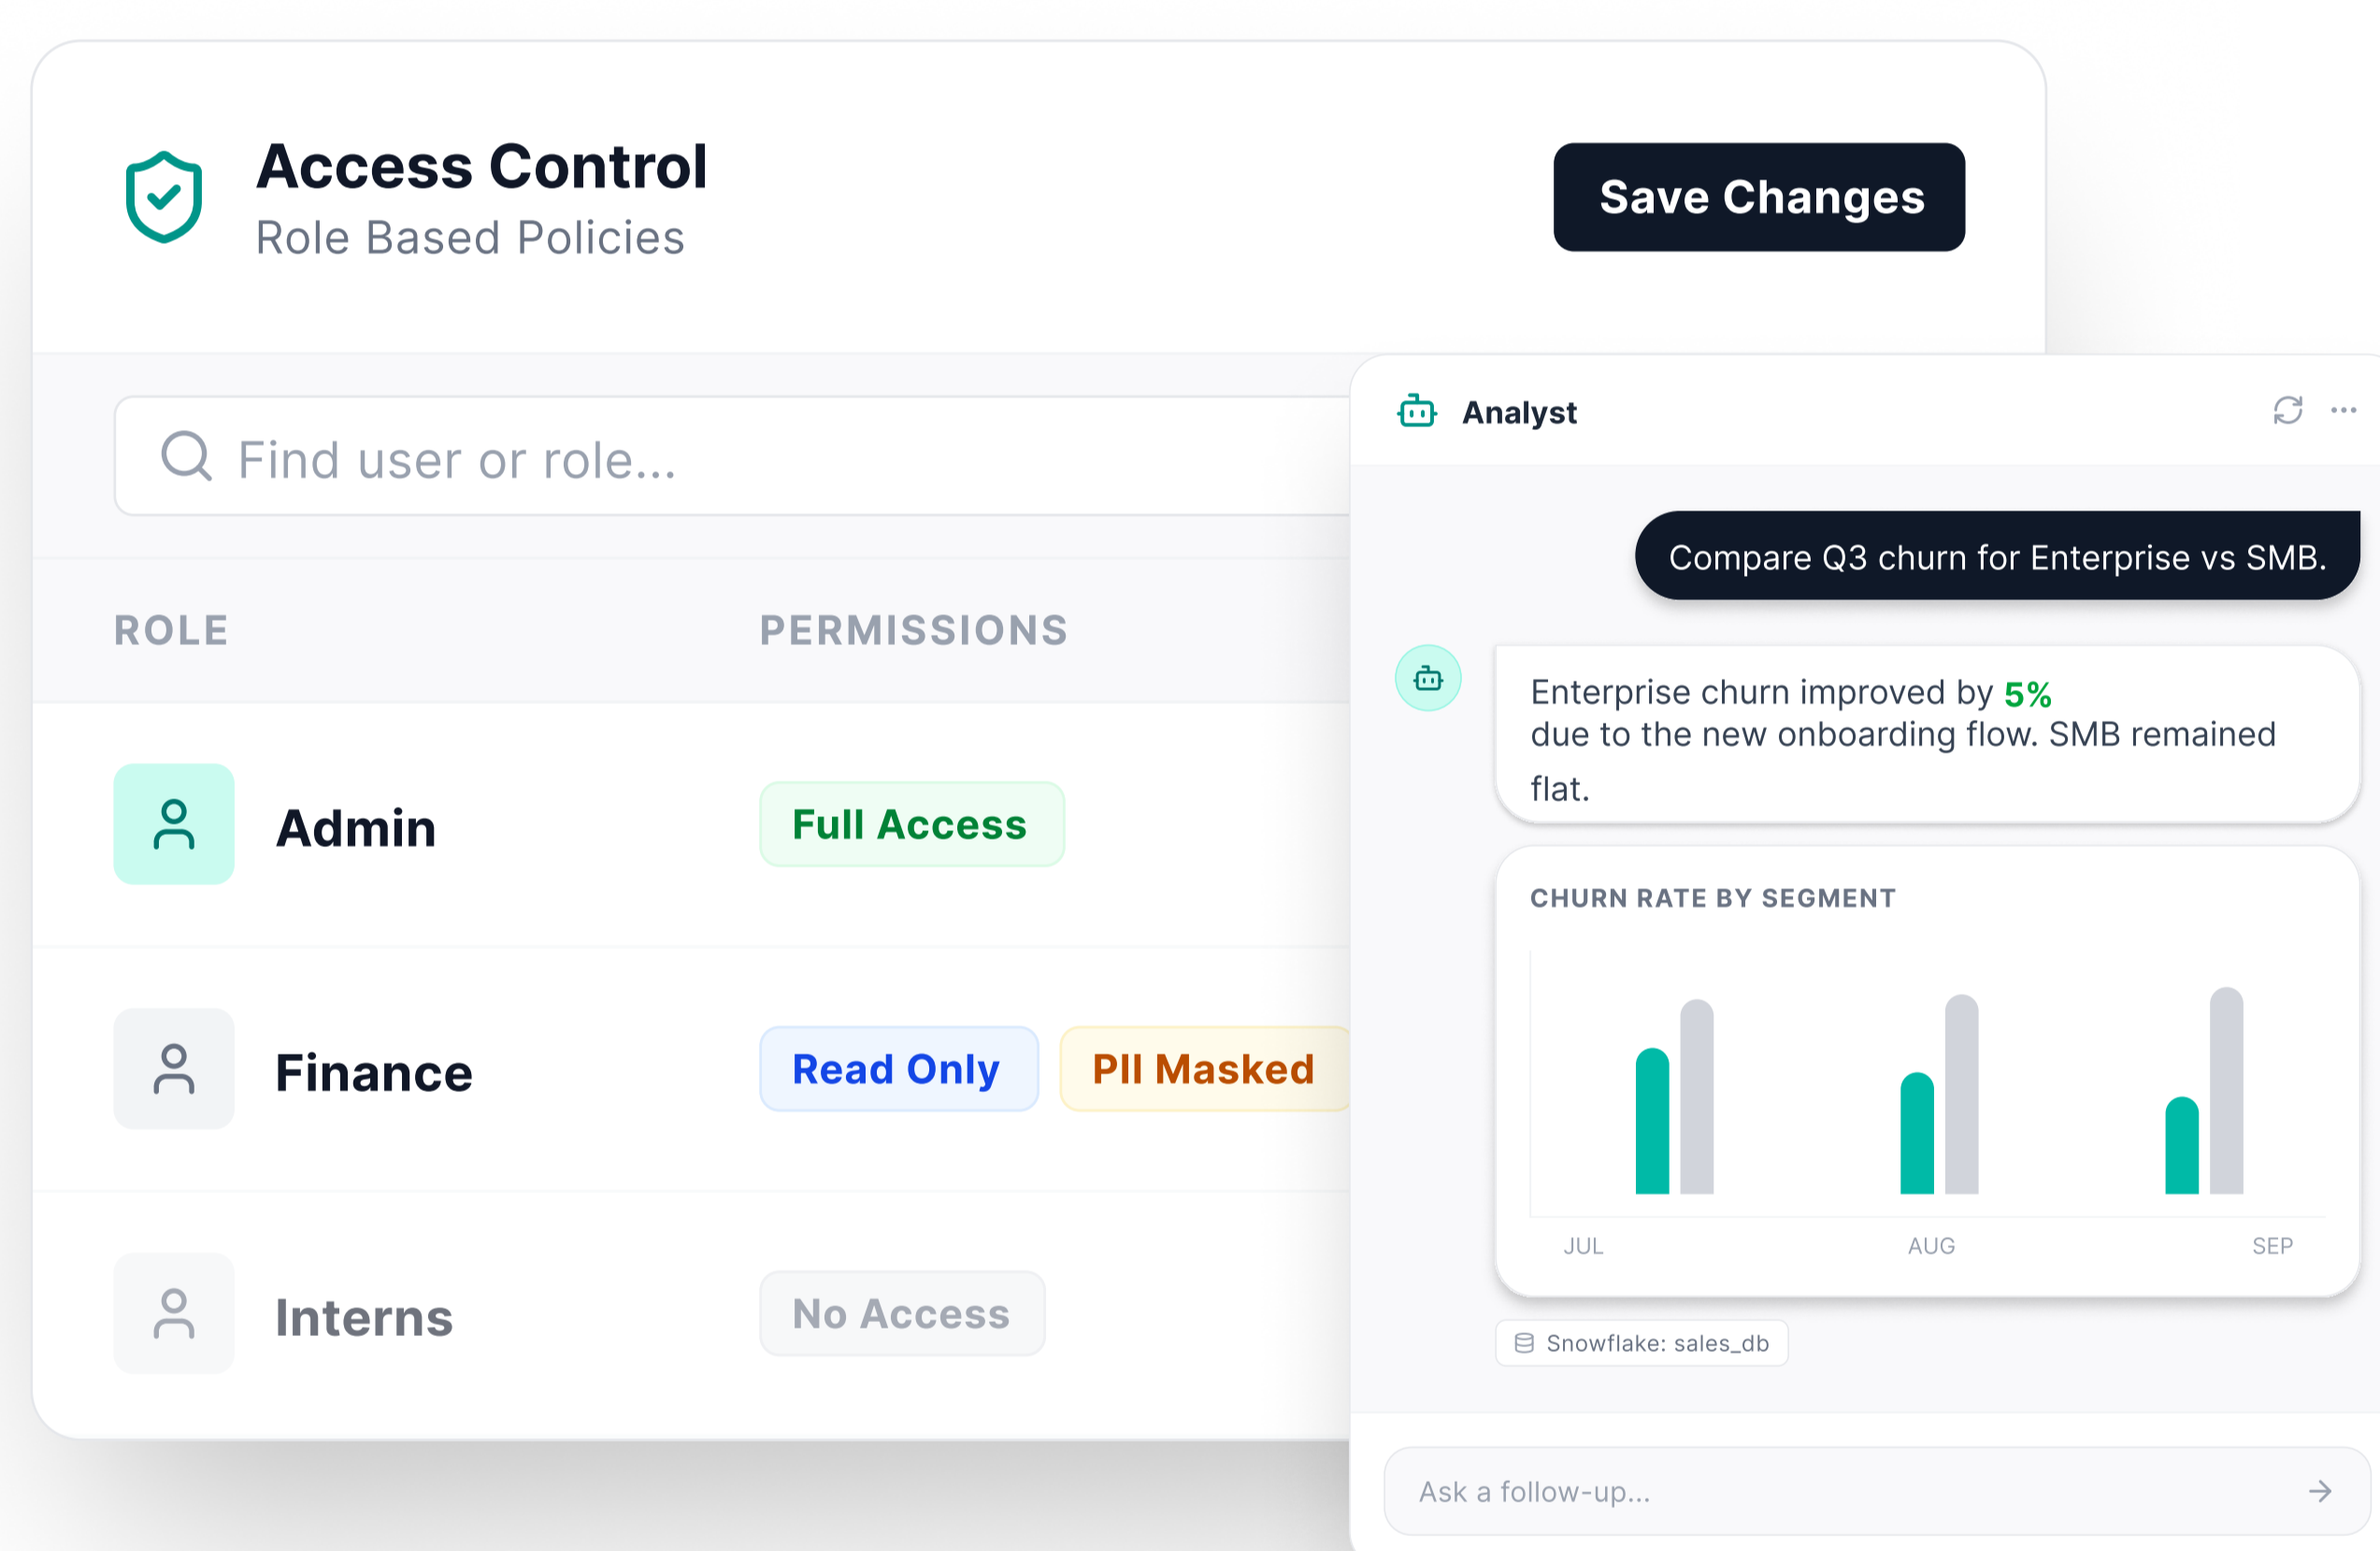

Implements granular Role-Based Access Controls to ensure users only interact with information authorized for their role.

Audit Trail Manager

Maintains a 100% auditable record of every data query and system-generated outputs for total transparency.

Privacy Guard Agent

Ensures all knowledge activation adheres to strict organizational data sovereignty and privacy standards.

The Sovereign Advantages

- ✓ **Proprietary SLM/ELM Intelligence:** Proprietary RAG-based models provide expert-level data analysis that is faster, cheaper, and inherently more secure.
- ✓ **Flexible Deployment:** Safeguard your proprietary knowledge with deployment on Cloud, your Private VPC, or On-Premise.
- ✓ **Seamless Integration:** Ingests data from any source—files, videos, or URLs—to learn your institutional knowledge and deliver reliable, context-aware outputs.

PopAI is an agentic AI provider engineered to deliver measurable P&L impact. We architect foundational orchestration systems, proprietary agents, and domain-specific SLMs/ELMs secured within your infrastructure. Backed by a 2,500+ person human-in-the-loop workforce, we verify every action to ensure 100% operational integrity. We don't just generate outputs; we deliver measurable outcomes, driving profit growth.
